

Exhibit 1.01

CONFLICT MINERALS REPORT OF IDEX CORPORATION FOR THE REPORTING PERIOD FROM JANUARY 1 TO DECEMBER 31, 2015

I. Introduction

This is the Conflict Minerals¹ Report of IDEX Corporation (“we,” “our,” “us,” “IDEX Corporation,” or the “Company”) prepared for calendar year 2015 in accordance with Rule 13p-1 (“Rule 13p-1”) under the Securities Exchange Act of 1934 (the “Act”). Numerous terms in this Report are defined in Rule 13p-1 of the Act and Form SD and the reader is referred to those sources, and also to Release No. 34-67716 (August 22, 2012) of the Act (the “Adopting Release”) for such definitions.

In accordance with Rule 13p-1, we undertook efforts to determine the content and source of the minerals within our products. The Company designed its efforts in conformity with the internationally recognized due diligence framework put forth in the *OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas*² (“OECD Due Diligence Guidance”) and related Supplements.

The statements below are based on the activities performed to date and in good faith by IDEX Corporation and are based on the infrastructure and information available at the time of this filing. Factors that could affect the accuracy of these statements include, but are not limited to, incomplete supplier data or available smelter data, errors or omissions by suppliers or smelters, evolving definition and confirmation of smelters, incomplete information from industry or other third-party sources, continuing guidance regarding the SEC final rules, and other issues.

II. Overview

Company Profile

IDEX Corporation is a Delaware corporation incorporated on September 24, 1987. The Company is an applied solutions business that sells an extensive array of pumps, flow meters and other fluidics systems and components and engineered products to customers in a variety of markets around the world. All of the Company’s business activities are carried out through wholly-owned subsidiaries.

¹ The term “conflict mineral” is defined in Section 1502(e)(4) of the Dodd-Frank Wall Street Reform and Consumer Protection Act as (A) columbite-tantalite, also known as coltan (the metal ore from which tantalum is extracted); cassiterite (the metal ore from which tin is extracted); gold; wolframite (the metal ore from which tungsten is extracted); or their derivatives; or (B) any other mineral or its derivatives determined by the Secretary of State to be financing conflict in the Democratic Republic of the Congo (“DRC”) or an adjoining country.

² OECD (2013), *OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas: Second Edition*, OECD Publishing. <http://dx.doi.org/10.1787/9789264185050-en>

Exhibit 1.01

The Company has three reportable business segments: IDEX Fluid & Metering Technologies systems are used in a wide variety of severe duty and/or highly precise fluid-handling applications around the world. Customized solutions range from diesel engine lubrication to food and beverage processing to the movement, measurement and dispense of fossil fuels, ethanol and other high value liquids and gases. With some of the most recognized brand names in positive displacement pumps, flow meters, compressors and injectors, IDEX is a supplier of choice within the rapidly growing infrastructure markets including alternative energy, oil & gas, water and wastewater.

Supporting rapid global growth in drug discovery, clinical diagnostics and medical technology advancements, our Health & Science employees design, produce and distribute small-scale, highly precise fluidics components and sub-assemblies used in analytical and diagnostics instruments, as well as a growing range of medical equipment and implantable devices. Within this segment, it's all about enabling increasingly small and precise sample sizes, more accurate analysis and quicker results for technicians and patients alike.

When seconds count, our Fire & Safety equipment matters most. Our highly engineered firefighting pumps and foam systems, as well as our Jaws of Life® extrication and recovery tools, are the preferred equipment of Fire & Safety professionals around the globe. Complementing the municipal fire and safety markets, our diversified products group engineers band clamping solutions found everywhere from corner traffic lights and signposts to subsea and marine applications. Our paint dispensing solutions are found at major home improvement stores and independent retailers across the United States and Europe, enabling consumers to obtain a perfect color match every time.

We are subject to this rule as we have determined that, during 2015, conflict minerals were likely necessary to the functionality or production of products we manufactured or contracted to manufacture. The Company, as a purchaser of component parts, is many steps removed from the mining of conflict minerals. We do not purchase raw ore or unrefined conflict minerals, and we conduct no purchasing activities directly in the covered countries.

Reasonable Country of Origin Inquiry Information

We have conducted a good faith reasonable country of origin inquiry (“RCOI”) to determine whether the necessary conflict minerals originated in the DRC or an adjoining country or came from recycled or scrap sources.

IDEX Corporation’s RCOI process included conducting an inquiry of our direct suppliers using the Conflict-Free Sourcing Initiative’s (“CFSI”) Conflict Minerals Reporting Template (“CMRT”). Based on the results of our RCOI, we exercised due diligence on the source and chain of custody of the conflict minerals in accordance with the OECD framework. Our due diligence efforts are discussed further in this Conflict Minerals Report.

Due Diligence Program Design

The Company designed its conflict minerals program to conform, in all material respects, with the five-step framework of the OECD Due Diligence Guidance, the Supplement on Tin, Tantalum, and Tungsten, and

Exhibit 1.01

the Supplement on Gold, specifically as they relate to our position in the minerals supply chain as a “downstream” company:

- Step 1: Establish strong company management systems
- Step 2: Identify and assess risks in the supply chain
- Step 3: Design and implement a strategy to respond to identified risks
- Step 4: Carry out independent third-party audit of smelter/refiner's due diligence practices
- Step 5: Report annually on supply chain due diligence.

III. Due Diligence Measures Performed by IDEX Corporation

The following describes the measures taken to reasonably determine the country of origin and to exercise due diligence in the mineral supply chain in conformance with the OECD Due Diligence Guidance.

Step 1: Establish strong company management systems

- a. Conflict minerals team – IDEX Corporation established a conflict minerals team that includes individuals from the appropriate business units and departments, including: Finance, Supply Chain, Legal, and Compliance. The team was structured to include the involvement from those in upper management roles to ensure critical information, including the Company’s conflict minerals policy, reached relevant employees and suppliers. We also engaged a 3rd party to assist us with our compliance efforts.
- b. Conflict minerals policy – IDEX Corporation adopted and published a policy highlighting the Company’s commitment to complying with the reporting and due diligence obligations required by the SEC rule and the Company’s expectations from its suppliers. The policy resides on our corporate website (<http://idexcorp.com/segments/sourcing/index.asp>). It is reviewed annually and will be updated, if necessary.
- c. Internal engagement – We developed a training program for internal use to educate relevant employees on our conflict minerals program and reporting obligations.
- d. Supplier engagement – IDEX Corporation provided a Supplier letter, which included educational materials to our queried suppliers. Suppliers were provided information on the conflict minerals disclosure requirements and were directed to the CFSI training programs for additional information.
- e. Company level grievance mechanism – As recommended by the OECD Due Diligence Guidance, IDEX Corporation has established a grievance mechanism as a risk-awareness system for conflict minerals issues. Stakeholders can communicate directly and confidentially with our compliance officer or through our Conflict Minerals central inbox.
- f. Records management – IDEX Corporation will maintain records relating to our conflict minerals program in accordance with the recommended record retention guidelines of five years.

Step 2: Identify and assess risks in the supply chain

We performed the following steps as part of our risk assessment process:

- a. Identified products in scope – Our conflict minerals team conducted a detailed review of the products manufactured or contracted to be manufactured during the Reporting Period as well as prior year’s

Exhibit 1.01

conflict mineral information to identify products that should be deemed in-scope as described by the Adopting Release.

- b. Conducted RCOI – IDEX Corporation utilized the industry-developed CMRT to query our suppliers for conflict minerals information. We requested this information from the suppliers who provide material and components for the products deemed in-scope by our conflict minerals team. We evaluated the responses from the templates submitted by our suppliers to determine our reporting obligation based on this RCOI. See Appendix I for a list of countries of origin identified through the RCOI process.
- c. Completed additional follow-up – IDEX Corporation contacted direct suppliers that did not respond to our request for conflict minerals information by the requested date. We also worked to clarify and validate the information provided by our suppliers.
- d. Identified smelters or refiners (“SORs”) – IDEX Corporation compiled a list of SORs in our supply chain using our supplier’s responses in their CMRTs.

Step 3: Design and implement a strategy to respond to identified risks

We performed the following steps as part of our risk management plan:

- a. Designed and implemented a plan – IDEX Corporation used risk criteria to evaluate suppliers based on the responses provided within their CMRT as well as any additional documentation furnished to support those responses and the suppliers’ due processes. The resulting risk criteria will be used to develop specific supplier outreach and training to address the identified risks and to take corrective actions with suppliers found not in compliance with our conflict minerals policy.
- b. Verified SORs – As part of the risk mitigation process, the Company reconciled the list of SORs collected from suppliers to the list of smelter facilities identified by the CFSI’s Conflict-Free Smelter Program.

Step 4: Carry out independent third-party audit of smelter/refiner's due diligence practices

IDEX Corporation is relying on published lists from CFSI, London Bullion Market Association (LBMA) and Responsible Jewelry Council (RJC), to confirm the existence and verify the conflict-free status of SORs identified during our due diligence.

Step 5: Report annually on supply chain due diligence

Accordingly, this Conflict Minerals Report has been filed with the SEC and is available on our website at <http://idexcorp.com/segments/sourcing/index.asp>.

IV. Product Description; Processing Facilities

Product Description – The Company has three reportable business segments: IDEX Fluid & Metering Technologies systems are used in a wide variety of severe duty and/or highly precise fluid-handling applications around the world. Customized solutions range from diesel engine lubrication to food and beverage processing to the movement, measurement and dispense of fossil fuels, ethanol and other high value liquids and gases. With some of the most recognized brand names in positive displacement pumps, flow meters, compressors and injectors, IDEX is a supplier of choice within the rapidly growing infrastructure markets including alternative energy, oil & gas, water and wastewater.

Exhibit 1.01

Supporting rapid global growth in drug discovery, clinical diagnostics and medical technology advancements, our Health & Science employees design, produce and distribute small-scale, highly precise fluidics components and sub-assemblies used in analytical and diagnostics instruments, as well as a growing range of medical equipment and implantable devices. Within this segment, it's all about enabling increasingly small and precise sample sizes, more accurate analysis and quicker results for technicians and patients alike.

When seconds count, our Fire & Safety equipment matters most. Our highly engineered firefighting pumps and foam systems, as well as our Jaws of Life® extrication and recovery tools, are the preferred equipment of Fire & Safety professionals around the globe. Complementing the municipal fire and safety markets, our diversified products group engineers band clamping solutions found everywhere from corner traffic lights and signposts to subsea and marine applications. Our paint dispensing solutions are found at major home improvement stores and independent retailers across the United States and Europe, enabling consumers to obtain a perfect color match every time.

Processing Facilities – Based on our due diligence process and the information received from our suppliers, the following facilities were identified by the Company's suppliers as the smelters and refiners of the tin, tantalum, tungsten and/or gold present in and necessary to the functionality of products manufactured by the Company in the year ended. The information from our suppliers is still evolving and may contain company level declarations. As such, this smelter list is presented in good faith as the best information we have to date. This list may contain smelters that are not in our supply chain and there may be other smelters not yet identified in our due diligence process. We will continue to update the list as our information and the relevant third-party data from CFSI, LBMA, and RJC improves.

V. Future Due Diligence

We will continue to communicate our expectations and information requirements to our direct suppliers. Over time, we anticipate that the amount of information globally available on the traceability and sourcing of these ores will increase and improve our knowledge. We will continue to make inquiries to our direct suppliers and undertake additional risk assessments when potentially relevant changes in facts or circumstances are identified. If we become aware of a supplier whose due diligence needs improvement, we may continue the trade relationship while that supplier improves its compliance program. We expect our suppliers to take similar measures with their suppliers to ensure alignment throughout the supply chain.

Exhibit 1.01

In addition to those above, the Company will undertake the following steps during the next compliance period:

- Continue to collect responses from suppliers using the most recent revision of the CMRT.
- Engage with suppliers that did not provide a response in 2015 or provided incomplete responses to help with our data collections for 2016.
- Monitor and track performance of risk mitigation efforts.
- Compare and validate RCOI results to information collected via independent conflict-free smelter validation programs such as the CFSI.
- Continue to allow verified conflict-free material from the region to enter our supply chain.

VI. Independent Private Sector Audit

Not required for calendar year 2015.

Exhibit 1.01

APPENDIX I – Countries of Origin

The information provided in this Appendix is based on the information collected from IDEX Corporation's suppliers.

Angola	France	Portugal
Argentina	Germany	Republic of Congo
Australia	Guyana	Russia
Austria	Hungary	Rwanda
Belgium	India	Sierra Leone
Bolivia	Indonesia	Singapore
Brazil	Ireland	Slovakia
Burundi	Israel	South Africa
Cambodia	Japan	South Korea
Canada	Kazakhstan	Spain
Central African Republic	Kenya	Suriname
Chile	Laos	Switzerland
China	Luxembourg	Taiwan
Colombia	Madagascar	Tanzania
Côte D'Ivoire	Malaysia	Thailand
Czech Republic	Mongolia	Uganda
Djibouti	Mozambique	United Kingdom
Ecuador	Namibia	United States of America
Egypt	Netherlands	Vietnam
Estonia	Nigeria	Zambia
Ethiopia	Peru
